Abstract of EP0478412

The installation uses video, computer and plastic-money means, comprising: - a) a central management and control unit (10), - b) at least one camera (21a) for recording images relating to a games table (20a) placed in a games room (2) of a casino; - c) at least one unit (22a) for the input of information relating to the progress of a game on said table, this input unit being arranged in the said room; - d) a multiplicity of game terminals (40) linked to the central unit and capable of transmitting messages between the latter and respective players located outside the games room, each terminal comprising a screen capable of displaying the image recorded by the camera; and - e) an account-control unit (31) arranged at the cashdesk (3) of the casino and capable of exchanging information relating to the accounts of the external players with the central unit.
